

Surviving the iBuy:

How real estate agents are differentiating with personalized service.

iBuy platforms and other digital technologies have disrupted the real estate industry, dramatically altering the way in which buyers and sellers navigate the process and engage with agents. A recent Ruby survey uncovered how successful real estate agents and brokers are striking the delicate balance of leveraging new technology to meet evolving client expectations while still maintaining a people-first approach that provides the high-touch service needed to win trust and new business.

Clients say response time is critical.

of home buyers report that response time is "very important" in choosing an agent.¹

Mr. Marked

TITTTTT

82%

cite a slow response time as their biggest source of dissatisfaction.²

40%

want to contact a potential agent for the first time via phone.³

But many agents are struggling with availability.

From sending callers to voicemail and failing to respond online...

of agents maintain their own website and search for leads daily.

don't have a contact form, chat option, or any means for visitors to contact them directly.

report taking more than one day to respond to visitors who submit a message on their website.⁷

The cost of a missed connection can be high.

100% of respondents report lost commissions due to missed phone calls...

25% believe that amount totals more than \$20,000 (in just the last 12 months alone!)

•••

Investing in live receptionist services for better client experiences.

Adding live chat to their website for 24/7 responsiveness.

volume of business calls they receive everyday.

in the next 12 months.

Did you know? More than half of the agents surveyed report that 10% - 25% of the phone calls they receive are

coming from potential new clients!

Did you know? 33% of successful agents earning more than \$125,000 each year have chat enabled on their website.

Even in the age of the iBuy, the phone call still reigns supreme.

of real estate agents receive 11 - 25 business phone calls every day

receive more than 26 business phone calls every day [That's a lot of calls!]

VIRTUAL RECEPTIONIST SERVICES

Prioritizing client phone calls can boost satisfaction and commissions.

If you get 3 calls per **business day,** and answer 100% of them

13.25% of those calls will result in a **new lead**

17% of those leads will become new clients

60 Inbound calls/month

New leads/month

New client/month

LIVE CHAT SERVICES

Adding website live chat helps agents reach new digital-forward clients, competing with iBuys.

If you get 15 engaged chats per business month, and answer 100% of them

40% of those chats will result in a **new lead**

Chatters buy, on average, 12% of the time

New leads/month

New client/month

iBuys can't deliver the personalized touch clients crave and are willing to pay for.

••• Agents using live virtual receptionists to support their business can earn an additional **\$8K a month** closing one more deal at an average cost of \$279,00 at a 3% commission.

Agents that offer a live chat option as well can double that, earning \$16K every month!
